

# Yahya BELLMIR AI & Data Science Engineer

+212 7 78 66 40 75 · yahyabellmir@gmail.com · Morocco, Casablanca (open to relocation) ·  ·  · [MyPortfolio](#) 

Engineer in AI & Data Science, specialized in **LLMs**, Generative AI and **RAG**, with experience in developing and deploying AI solutions on **Azure/AWS**. Skilled in Fine-tuning, LangChain, FAISS, React/Spring Boot and AI model industrialization. **Available immediately**.

## EXPERIENCE

**PFE - AI & Development Engineer, VINCI Energies Morocco** | On-site (Casablanca, Morocco) February 2026 - July 2026

- Designed **Pulse**, an AI-powered PMS (React.js, Python, Azure) for real-time site progress tracking.
- Secured the cloud architecture with Azure (**Entra ID SSO**, Cosmos DB, Blob Storage) for data management.
- Developed **Generative AI** services (LLM/RAG, OCR) for reporting and intelligent data analysis.
- Deployed the application on Azure (Static Web Apps, Functions, **CI/CD**) for automated production release.

**Data Scientist Intern, Declic (500 Global) Data Science** | Remote (Paris, France) June 2025 - September 2025

- Fine-tuned **TinyLlama** (SFT + DPO) to recommend events by context, achieving **91.3%** accuracy (vs **88.1%**).
- Developed a **T5** pipeline transforming raw user logs into structured, quality-validated training datasets.
- Deployed via containerized inference (**Docker** + **Ollama**) and co-authored a submitted conference paper (UPEC).

**Internship, RADEM Meknes Web Development** | On-site (Meknes, Morocco)   August 2024 - September 2024

- Developed a full-stack supervisor assignment app with **Java**, **Spring Boot**, **MySQL** and multi-role Spring Security/BCrypt.
- Designed a responsive Bootstrap/Thymeleaf UI and containerized the complete application via **Docker**.

## PROJECTS

**AI Platform for Test Plan Generation** | NLP & RAG   October 2025 - January 2026

- Automated extraction of requirements (ID, type, priority) from PDF/DOCX via **RAG** pipeline (FAISS, Embeddings).
- Deployed as SaaS (FastAPI, Docker Compose) with Req↔Test traceability and Excel/JSON export.

**NetPlag-Stream: Distributed Plagiarism Detection System** | AI & Big Data   October 2025 - December 2025

- Designed a real-time distributed pipeline (**Spark Streaming**, Delta Lake, Elasticsearch) for plagiarism detection.
- Implemented similarity scoring via HDFS and containerized Spark, Elasticsearch and Flask with Docker Compose.

**Multi-Agent System for Mapping and Surveillance** | Robotics & AI   February 2025 - June 2025

- Designed a cooperative multi-agent exploration algorithm (Python, Webots) with real-time map fusion.
- Integrated **YOLOv8** for object detection and a smart alarm system to limit false positives.

## EDUCATION

**Higher School of Arts and Crafts (ENSAM) :** Meknes, Morocco

- Engineering Cycle: *Industrial Engineering Artificial Intelligence and Data Science* September 2023 – July 2026
- Integrated Preparatory Year* September 2020 – July 2023

## Certificates

|                                                                                    |      |
|------------------------------------------------------------------------------------|------|
| Agile Enterprise Coach: Agile Fundamentals Certification                           | 2025 |
| DataCamp: Certified Associate Data Scientist   Career Certification                | 2025 |
| ExpertEase Education: Power BI Fundamentals A to Z                                 | 2025 |
| DataCamp: Data Engineer in Python, Deep Learning with PyTorch   Career Tracks      | 2025 |
| French Institute: DELF B2 (Diplôme d'Études en Langue Française)                   | 2025 |
| DataCamp: AWS Cloud Practitioner (CLF-C02)   Microsoft Azure Fundamentals (AZ-900) | 2026 |

## SKILLS

|                  |                                                                                                                                    |
|------------------|------------------------------------------------------------------------------------------------------------------------------------|
| Languages        | Python, C++, Java, JavaScript, HTML, CSS                                                                                           |
| Software & Tools | Linux, TensorFlow, PyTorch, Docker, React, Spring Boot, Git, Power BI, Apache Spark, Hadoop, Elasticsearch, Microsoft , Amazon AWS |
| Academic         | Machine Learning, Deep Learning, Data Science, Data Analytics, Big Data, Prompt Engineering, Computer Vision, NLP, Lean Six Sigma  |
| Soft Skills      | Time Management, Problem-solving, Engaging Presentation, Leadership, On-site Coordination, Teamwork, Adaptability, Communication   |
| Frameworks       | RAG, ReadTheDocs, Hugging Face, Langchain, Ollama, Fine-tuning, REST APIs                                                          |
| Methodologies    | Agile, Scrum, DevOps, CI/CD, Documentation                                                                                         |
| Office Software  | Excel, Word, LaTeX, PowerPoint                                                                                                     |

## Languages

**English** : fluent      **French** : fluent      **Arabic** : native language
